ABSTRACT OF THE DISCLOSURE

A method to deploy wireless network security with a wireless router is disclosed. In one aspect, the present disclosure teaches a method for activating a wireless network security with a wireless host including establishing a communication connection with a client. The method further includes, in response to the communication connection, automatically requesting from the client a determination of whether to activate the wireless network security. The method further includes, upon receipt of the determination to activate the wireless security network, automatically requesting an identifier code from the client. The method further includes activating the wireless security network to secure the wireless host if the identifier code matches a unique key-code that is physically located on the wireless host.
